

The **PROJECTOR LIFT SI-100** is a versatile and innovative product that enables the installation of projectors in environments where particular aesthetical solutions are needed.

The product has been developed to be installed inside false ceilings in order to hide projector, lift and cables, thus granting the best aesthetic and practical solution.

The **SI-100** is supplied with an extremely **SILENT** motor that allows a descent from a minimum of 16 cm. to a maximum of 90 cm.

**PROJECTOR LIFT
PARTLY OPEN**
